LETTER FROM THE PRESIDENT

\*\*\*\*\*  
 \* Daisy Moore, "Mrs. Dexter " to ADCA members,  
 \* has passed away. She devoted her life to the preser-  
 \* vation and promotion of the Dexter breed of cattle,  
 \* maintaining the records of the association for 32 years  
 \* as Secretary/Treasurer until her resignation in 1982.  
 \* Prior to this she had, from her youth, worked along-  
 \* side her father, John Logsden, building what is today  
 \* the oldest herd of Dexters in America. Our sympathy  
 \* is extended to her daughter, Kay Moore Baker and her  
 \* family in their loss.  
 \*\*\*\*\*

1984 MEETING DATES - JUNE 22nd & 23rd

The 1984 ADCA Meeting is being held in Bridgewater Corners, VT. It is our hope that all of the mid-west, east and southeastern breeders will be able to attend. Our meetings are always beneficial - we learn from each other as well as from speakers and presentations at the meetings. A registration blank is enclosed for those of you who may not have sent yours in yet. Wilmer Schmell, as noted on the forms, is handling all reservations, and is planning a most productive meeting.

Dexter Cattle, by John Hays. John Hays, in his usual persistent manner, has seen the American Dexter Cattle book through to completion. He has produced a delightful, yet factual book, high-lighted by charming illustrations done by his wife, Belle. All that remains is to set a policy for price and marketing which will be done at the meeting in June. Thank you, John!!!

K's KORNER

The following is Kay's letter of May 12, 1984 to Region 1 members:

It is with regret that I am writing this letter. Daisy Moore had a stroke and has passed away.

At the annual meeting upcoming in Bridgewater Corners, Vermont, June 22nd and 23rd, some further decisions will be made. During the interim, if you have any questions, give me a call at either of these numbers:

- (507) 288-1873 work
- (507) 289-2836 residence

Or, my brother Michael can be reached at the farm (319) 735-5772. He is very knowledgeable about Dexters.

Sincerely,

Kay Moore Baker  
Secretary-Treasurer

REPORT FROM NORTH PLAINS REGION

The Fleharty family of Higginsville, MO sends us the following article:

"Would You Like to Milk, But Not Really?" As a Dexter owner, have you often wanted to milk, but felt the demand of milking twice a day everyday would be too much for your schedule? We have tried two methods of milking that are less demanding.

The first method is simply once a day milking. In fact, we have gone up to two days without milking. Our experience is that a Dexter cow will give a gallon a day milked in this irregular fashion.

The second method is easier and, at the same time, more difficult. It is easier because you don't have to milk for weeks at a time. It is more difficult in that you have to trick the cow or calf into a separate pen and keep them separated for about half a day. One other problem is the cow may not want to let her milk down for you, so you have to milk on one side while the calf nurses on the other side. Again you can get about a gallon of milk and get it when you want it.

If any of you would like to milk, but not really, we hope you would consider one of these methods.

Karrie, Todd & Dean Fleharty

REPORT FROM THE PACIFIC REGION

The only known newsworthy item at this writing is the fact that I have completed the book on Dexters which I was asked a year or so ago to come up with. Three hundred copies have been printed and a decision on pricing, distribution, etc. will no doubt be forthcoming soon.

There has been some inquiry as to when and where the next Pacific Regional meeting will be held. If one is to be held this year it will have to be some time after the Annual Meeting June 22 and 23 in Vermont which Belle and I plan to attend.

John Hays, Director Pacific Region
